EDUCATION

Cornell University, Ithaca, NY *- M.P.S. Information Science*
GPA: 4.18 **AUG 2025 ONGOING**

- **Relevant Coursework:** HCI Design, Computing for Information Science, AI Chatbots RAG and AI Agents, AI Innovation Lab

Rensselaer Polytechnic Institute, Troy, NY *- B.S. Games and Simulations Arts and Sciences / B.S. Electronic Arts*
GPA: 3.54 **AUG 2021 - DEC 2024**

EXPERIENCE

Sammurai, Port Washington, NY - *Project Engineer* **MAY 2026 - NOW**

- Prototype and implement interfaces across **multiple company product lines**, translating early concepts into functional product experiences through interactive prototyping and **front-end development**.
- Own **end-to-end front-end delivery** for an AI startup, from UI design and prototyping to deployment.
- Drive **UX research, information architecture, and interaction design** across core product flows, translating product direction into interface structures, interactions, and usable experiences.

Assurant (Intern), Atlanta, GA - *UX Researcher / Conversational Design* **JAN 2026 - MAY 2026**

- Researched **GenAI** disclosure, conversational flows, and AI-to-agent handoffs for **enterprise IVR**.
- Supported **conversational prototypes** and user testing plans for auto-service journeys, shaping **prompt strategy**, user personas, and fallback behavior across AI-assisted interactions.

Ecolab (Contract), St. Paul, MN - *Data Science / ML Researcher* **SEP 2025 - DEC 2025**

- Developed a **time-series data pipeline** and **EDA dashboards** to standardize daily sensor aggregates and prepare model-ready datasets, using exploratory analysis to identify and diagnose sensor outages.
- Incorporated domain constraints into **XGBoost** models and compared configurations for corrosion detection; the best configuration achieved **100% accuracy** on no-corrosion cases and **74% detection** on corrosion cases.

Mechanist Games (Intern), Xiamen, China - *VFX Artist* **FEB 2025 – MAY 2025**

- Implemented **real-time UI and gameplay VFX in Unity**; collaborated on integration and performance optimization.

Sharron Art Center (Part Time), North Brunswick, NJ - *Instructor* **JUN 2023 - AUG 2024**

- **Sole instructor** for Intro to Game Design across two summer terms, delivering **30 three-hour classes** on game art pipelines and animation and guiding students through individual portfolio projects.

RESEARCH EXPERIENCE

Cornell University - Sibley School of Mechanical & Aerospace Engineering, Ithaca, NY
Research Assistant (Part Time) **JUN 2026 - SEP 2026**
Graduate Student Researcher **JAN 2026 - MAY 2026**

- Developed **Unity-based VR simulations** for agrivoltaic farm research across student and part-time staff roles, using interactive environments to explore solar-panel placement on real-world farm sites.
- Built **scene scripts** and **realistic 3D assets** for solar panels, farm equipment, and vegetation; adapted site layouts using satellite reference data and feedback from clients and stakeholders.

Cornell Virtual Embodiment Lab, Ithaca, NY
Graduate Student Research Assistant **JAN 2026 - JUN 2026**

- Contributed **prototype implementation and interaction logic** to a Unity-based firefighter simulator, refining usability, interaction flow, and prototype functionality for immersive training experiences.

Cornell AI Innovation Lab - AI Transcription Project
Project Contributor **JAN 2026 - MAY 2026**

- Collaborated on an **AI transcription service** for Cornell's veterinary school, connecting an HTML interface to automated **n8n workflows** for processing audio recordings and generating customizable summaries.
- Supported large MP3/WAV recordings through parallel **GPT-4o transcription** and **speaker diarization**, with **Claude-generated summaries** customized for the veterinary school's transcription workflow.

TECHNICAL SKILLS

Development: Python, C#, Unity, XGBoost
Tools: Figma, GitHub, Perforce, Blender

PRODUCT SKILLS

UX research, information architecture, interaction design
Interactive prototyping, conversational design
